

ATTC

PHD 2000

PHD 2000 Conversion For HT2000®

The American Torch Tip PHD 2000 has been designed to retrofit many common plasma machines* including the HT2000® power supply and leads. It is domestically engineered and manufactured to stringent tolerances allowing the toughest applications to take advantage of the ATTC product improvements.

BENEFITS

Lower Operating Costs

- Up to 30% increase in travel speeds means increased hourly output.
- Longer lasting parts lowers monthly usage.

Improved Cut Quality with NEW ATTC gas flow design

- Stronger piercing capability.
- Decreased spatter build up at time of pierce.
- Cleaner profile.
- Decreased bottom spatter and squarer edges.
- Significantly improved performance on 19 mm and thicker materials.
- Cut thicker material up to 38 mm.
